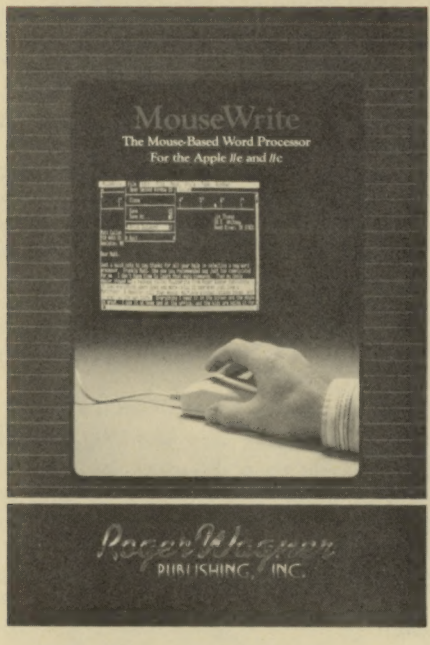
PRODUCT CATALOG



*** KNOWLEDGE**

Word Processing, Typing Instruction and Language software that's easy to understand and makes using the computer an activity shared by the whole family.

*** UTILITY**

Programming Tools for the novice or professional to help you write your own programs and take advantage of the true power of your computer.

*** VALUE**

Guarantee your investment, manage your information needs, and chart your course for tomorrow with software that pays for itself everyday.

Software for the Apple, IBM and Commodore 64 computers that increases your personal productivity.

PUBLISHING, INC.

THE WRITE CHOICE

The Personal Word Processing System

The Write Choice combines a **full-featured** word processor, a Hi-Res typing tutor, and a comprehensive documentation package that offers guidelines for style and formatting of all types of letters, outlines, manuscripts and reports.

The Write Choice is **ideal for the family** new to computing, yet hard to outgrow because of its many features. The Write Choice is also a favorite in schools because it is so **easy to learn** and offers such a wealth of reference information. Even experienced users appreciate the simple on-screen formatting.

The Write Choice is designed to be easy to use for the beginner, yet offers many advanced features such as "What you see is what you get" printouts; the screen displays text **exactly** as it will be printed, plus **page breaks that are displayed while you edit text**. On-screen **Help** commands are available at all times. You can **Cut and Paste** text anywhere in the document for quick and easy editing or use **Find and Replace** to correct any or all mistakes. Documents can be of **any length** and can be **Searched** for any character, word or group of words. Includes printer support for **underlining, bold, wide, and more**. The Write Choice can also do printouts in **double columns**. If you have The Printographer, you can even **print Hi-Res graphics** in your documents. Full Videx, //e or //c 80 column support, and it is unlocked, copyable and hard disk compatible.

The Write Choice also includes:

Tut's Typer is a combination **typing tutorial** and arcade game with Hi-Res graphics. Teaches fundamentals and proper typing technique. The game, "Tut's Tomb", is a fun way to develop speed and accuracy. With **24 lessons,** it keeps track of the last lesson, words-per-minute, and fast/slow keys for up to **25 different users.** Also includes 24 special lessons for the Dvorak keyboard option on the //c.

The Analyst is a program that **"reads"** the documents you create and gives you a report showing the number of words used, the average word length, the readability of your writing and the minimum grade level required to read your document. The numeric index is used by teachers and reading specialists to assure maximum reader comprehension.

The Word Processing Style Manual is a **formatting guide** for letters, manuscripts, outlines, and reports. Rules for proofreading, capitalization, punctuation, indentation, abbreviations, bibliographies and much more. Illustrations demonstrate common business letter techniques.

$44.95 48K Apple II, II+, //e or //c with DOS 3.3

MouseWrite

Mouse Based Word Processor

If you know how to point, you already know how to use **MouseWrite.** Full-featured and fun-to-use, **MouseWrite** makes word processing as easy as 'point and click.'

MouseWrite's Macintosh-like features include a desktop, pull-down menus, a built-in clock, dialog boxes, scroll bars, grow boxes, multiple windows, a clipboard, and even a puzzle for fun. Use scroll bars and grow boxes to change window sizes. Move the windows around the desktop with the mouse. Adjust page sizes or change tabs and margins with the ruler. Full cursor control and all commands are available at all times with both the mouse or keyboard.

Write anything from memos to manuscripts with **MouseWrite's** versatile word-processing features. Cut, copy, or paste characters, words, paragraphs, or pages to or from other documents. Move the cursor by character, word, line, sentence, paragraph, screen, beginning, or end of document. Select text to be edited, scroll text in four directions, or find and replace anything from characters to carriage returns. Adjust all margins and page lengths with push button ease. Other features include auto-page numbering, adjustable indentations, and page headers and footers with optional date and time displays (no hardware needed).

With 'What you see is what you get' screens, **MouseWrite** offers a wide variety of custom print options such as underlining, bold, wide, narrow, sub and superscripts, italics, proportional spacing and more, depending on your printer's capability. Other print-related features include printer pause; continuous or single sheet printing; draft or high quality printouts; right, left, center or fill justified text; and single, double, or triple spacing.

In selecting **MouseWrite** as the Editor's Choice (Jul '85), INCIDER Magazine said, "Even if MouseWrite had a standard interface, it would still be a powerful word processor. The addition of the Mac-like interface, however, makes it just about the **easiest-to-use full-featured word processor on the Apple market."**

You can try out all of **MouseWrite's** features for yourself. Just order your own **MouseWrite Demo** diskette for only $3.00 and see why MouseWrite is on the "leading edge of Apple II software technology."

$125.00 128K Enhanced Apple //e with Extended Memory 80 column card, or //c. Apple compatible mouse is optional but recommended.

ASSEMBLY LINES: THE BOOK

A Beginner's Guide to 6502 Programming

If you're struggling to learn assembly language programming by yourself - don't. Designed specifically for the **novice,** Assembly Lines: The Book starts with the fundamentals and works up to more sophisticated routines. It gives you a **clear understanding** of all 6502 instructions, disk access, reading and writing files, sound generation, basic math, keyboard and screen techniques and more. Also includes an **extensive reference section** describing all 6502 assembly language commands with examples of the most common usage of each. Compatible with all Apple assemblers including Merlin and Merlin Pro. Vol. II will be available in Summer '85.

$19.95 48K Apple II, II+, //e and //c

ASSEMBLY LINES: THE DISK

All the Programs from Assembly Lines: The Book

That's right! All those great programs in Assembly Lines: The Book are available **on a diskette**. No need to type in lengthy listings, we've done it all for you. Comes with over **50** assembler-ready source listings and assembled object files as listed in Assembly Lines: The Book. Source files are in text file form and were created with the Merlin assembler, but are compatible with most major assemblers. A real **time saver!**

$15.95 48K Apple II, II+, //e and //c

BEZARE

A Game with a Different Point of View

Bezare is the first Hi-Res arcade game written by an Alien. Battle ever-increasing numbers of transports and primitive armored vehicles manned by semi-intelligent life-forms from the third planet! Can you get to the third level?

$19.95 48K Apple II, II+, //e or //c

COPY-CAT

All-Purpose Copy and Catalog Editing

The all-purpose **CATALOG EDITOR** and **DISK COPY** utility for any unlocked disk. Create **custom catalogs** for your disks with normal, inverse or flashing titles and file names. Insert blank lines, underlines etc. Sort your catalogs **alphabetically** or arrange them in **any order** you choose. Select to copy the entire disk, or only the files or types that you specify such as Applesoft, Binary, Text, files with similar names etc. You can compare two different files or disks byte by byte for complete verification. Create DOS-less disks with **8k more storage space.** Includes **COPY-QUIK,** a fast copy utility that contains an option to copy only active tracks on the disk.

$19.95 48K Apple II, II+, //e or //c with DOS 3.3

MERLIN

The Macro Assembler for the Apple II

Merlin is an extremely powerful 6502 **macro assembler** with both 40 and 80 column support. Merlin's features include **nestable macros**, assemble to memory or disk, linked source files, and a word processor-like editor with **global** search and replace. Over 50 pseudo opcodes, **conditional assembly** within macros, cross-reference utilities, high-speed DOS and more! Merlin supports both the **6502** and **65C02** opcodes and is unlocked, copyable and hard disk compatible. Merlin also includes **SOURCEROR**, a disassembler to create source files from binary programs, and **SOURCEROR.FP** which produces a labeled and commented source listing of Applesoft BASIC.

$64.95 64K Apple II, II+, //e or //c with DOS 3.3

MERLIN PRO

The Professional Version of Merlin

With all of the standard Merlin features (macros, macro libraries, nested macros, conditional assembly, assemble to memory or disk, linked files, dummy program segments etc.), this **professional version** was designed specifically for the //e with 80 Column Extended Memory card or the //c, and comes with **both ProDOS and DOS 3.3** versions. Merlin Pro's enhancements include a powerful **Full Screen Editor,** a **Relocating Linker** to generate relocatable object code, the use of **Local Labels**, and Entry and External label definitions. Merlin Pro supports and assembles all **6502, 65C02, and 65802** opcodes. Merlin Pro also includes **SOURCEROR**, an easy to use disassembler that creates Merlin Pro source files from binary programs, and **SOURCEROR.FP** which produces a fully labeled and commented source listing of Applesoft BASIC. Unlocked, copyable and hard disk compatible.

$99.95 128K Apple //e or //c with DOS 3. 3 and ProDOS

MERLIN 64

The Macro Assembler for the Commodore 64

Merlin 64 is an extremely powerful 6502 **macro assembler** for the Commodore 64 with 80 column support or optional Soft-80 display if you don't have a card. Merlin 64's features include **nestable macros**, assemble to memory or disk, use of linked source files, and a versatile **Full Screen Editor** with global **search and replace**. Over 35 pseudo opcodes, cross-reference utilities, conditional assembly within macros, a Cycle Timer and more! Merlin 64 is unlocked and copyable. Also includes **SOURCEROR**, an easy to use disassembler that creates Merlin 64 source files out of binary programs, and a Monitor to move, compare, disassemble and dump blocks of memory.

$49.95 64K Commodore

MERLIN COMBO

This packages includes Merlin, Munch A Bug, and Assembly Lines: The Book offered together at a **special savings.**
$109.95 64K Apple II, II+, //e or //c

MERLIN 64 COMBO

This packages includes Merlin 64 and **Assembly Language for Kids,** the best selling **beginner's** book by Wm. Sanders.
$64.95 64K Commodore

MUNCH A BUG

A Machine Language Debugger for the Apple II

A powerful 6502 program de-bugger, Munch A Bug provides the means to **trace** through machine language programs **one step** at a time. With all 6502 registers and optional memory points displayed, you see exactly what occurs at each stage of your program and **quickly find any errors** in the code. More than just a simple step and trace utility, Munch A Bug includes its own mini-assembler, supports labels, and a special **conditional trace flag.** This means Munch A Bug can be put in a dormant state which will later **'pop-up'** in the trace mode when specified conditions are met. Thus routines within fully operational programs can be tested right at **run time.** With optional 40 or 80 column modes, it can relocate to any location including a 16K RAM card for maximum versatility. Unlocked, copyable and hard disk compatible.
$39.95 48K Apple II, II+, //e or //c with DOS 3.3

PRINTOGRAPHER

The Graphics Printing Program

If you have a **dot matrix** or **letter quality** printer and an interface card, Printographer can print your picture. No need for expensive graphics printer cards, Printographer is entirely **menu-driven** and with a few simple keystrokes you'll be printing perfect pictures in seconds. Features include **regular Hi-Res or Lo-Res** printing, normal or inverse inking, magnification up to 99 times, picture positioning, and **color** printouts if your printer supports this. With completely visual editing, you can crop your picture horizontally, vertically, or use special oval or diamond shaped cropping. You can also **add text** in any direction to your pictures with the **21 fonts** included. You can even **add Printographer** to any unlocked Applesoft program and it will automatically print your picture. Printographer supports more than 60 printers and 40 interface cards, and is unlocked and copyable.
$39.95 48K Apple II, II+, //e or //c with DOS 3.3
